

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (previously presented): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving\_image, whereby the display is provided with an interchangeable item of information.

Claim 2 (cancelled).

Claim 3 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the display is provided with a colored image representation.

Claim 4 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the display is a flat screen.

Claim 5 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the display employs one of TFT and plasmas technologies.

Claims 6-8 (cancelled).

Claim 9 (previously presented): A mirror as set forth in claim 1 wherein the display is connected to an input device.

Claim 10 (currently amended): A mirror as set forth in claim 9 ~~or claim 19~~ wherein the input device is an external input device.

Claim 11 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the mirror surface is part of a mirror insert which is associated with a frame which forms a mirror interior.

Claim 12 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the mirror surface is part of a mirror attachment which is fitted onto a frame to form a mirror interior.

Claim 13 (previously presented): A mirror as set forth in claim 11 wherein the frame delimits the mirror interior and is connected to the mirror surface.

Claim 14 (previously presented): A mirror as set forth in claim 13 wherein the frame is composed of channel profile members having a width (b) which determines the depth of the mirror interior.

Claim 15 (currently amended): A mirror as set forth in claim 1 ~~or claim 19~~ wherein the display is secured to a frame by strut means.

Claim 16 (previously presented): A mirror as set forth in claim 7 wherein the loudspeaker is associated with a perforated region of a frame.

Claims 17-20 (cancelled).

Claim 21 (new) A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, wherein the display includes hologram.

Claim 22 (new): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, wherein behind the mirror surface, at least one loudspeaker is connected to the display.

Claim 23 (new): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by

a display provided with a moving image, wherein behind the mirror surface, at least one loudspeaker is connected to an input device.

Claim 24 (new): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, including a radio receiver module for the image data.

Claim 25 (new): A mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror surface is transparent for seeing therethrough and is backed by a display provided with a moving image, including an integrated remote operating means for volume control.

Claim 26 (new): A mirror comprising:

front panel that displays information to a user and reflects an image of the user to the user; and

a computer system for providing the information to the front panel;

wherein said mirror is mounted in a room.

Claim 27 (new): The mirror of claim 26 wherein:

the front panel is switchable between displaying the information and reflecting the image.

Claim 28 (new): The mirror of claim 26 wherein:

the front panel simultaneously displays the information and reflects the image.

Claim 29 (new): The mirror of claim 28 wherein:

the user switches eye focus between the information and the image to perceive one of the information and the image.

Claim 30 (new): The mirror of claim 26 wherein said room comprises a bathroom.

Claim 31 (new): The mirror of claim 26 wherein the front panel comprises:

a user interface that displays the information to the user.

Claim 32 (new): The mirror of claim 31 wherein:

the information comprises one of news, an e-mail message, and an appointment calendar.

Claim 33 (new): The mirror of claim 31 wherein:

the user interface includes a graphical keyboard.

Claim 34 (new): The mirror of claim 31 wherein:

the user interface includes a character recognizer.

Claim 35 (new): A mirror comprising:

means for providing information;

means for displaying the information to a user and  
reflecting an image of the user to the user;

wherein said mirror is mounted in a room; and

the means for displaying simultaneously displays the  
information and reflects the image.

Claim 36 (new): The mirror of claim 35 wherein:

the means for displaying is switchable between displaying  
the information and reflecting the image.

Claim 37 (new): The mirror of claim 35 wherein:

the user switches eye focus between the information and the  
image to perceive one of the information and the image.

Claim 38 (new): The mirror of claim 35 wherein said room  
comprises a bathroom.

Claim 39 (new): The mirror of claim 35 wherein:

the information comprises one of news, an e-mail message,  
and an appointment calendar.

Claim 40 (new): The mirror of claim 35 wherein:

the means for displaying includes a graphical keyboard.

Claim 41 (new): The mirror of claim 35 wherein:

the means for displaying includes a character recognizer.

Claim 42 (new): A mirror information system comprising:

a mirror comprising

a front panel that displays information to a user and reflects an image of the user to the user; and

a computer system for providing the information to the front panel; and

a building wall, said mirror being coupled to said building wall.

Claim 43 (new): The system of claim 42 wherein said front panel comprises a user interface that displays the information to the user; and

wherein said user interface comprises at least one component selected from the group consisting of a graphical keyboard and a character recognizer.

Claim 44 (new): The system of claim 42 wherein the front panel is switchable between displaying the information and reflecting the image.
